10:15 am: GIS Council / Regional Council boundary issues - Van Coops

The State GIS Council is seeking to use existing regional data consortia to refine the process of obtaining local input and acquiring local information. They may also create regional representation boundaries; this would not dissolve our groups - just create new boundaries for the Council's purposes. In this item, we will discuss the merits of being represented at the Council by our own member versus combining with CIRGIS or other coastal groups to deliver a larger presence at the State level.

10:45 am: Regional orthoimagery project status report. Timing, opting in/out, methods.

11:00 am: Website

11:15 am: Announcements and brief project reports.

- a. Attendees may give up to 2 minute reports on current projects.
