In 2003, the Central Coast Joint Data Committee (CCJDC) and the Association of Monterey Bay Area Governments (AMBAG) initiated a project to acquire high resolution aerial imagery of the Monterey Bay Area.

The primary goal of this effort was to provide an improved aerial base layer for the region. A total of 25 agencies participated in the aerial imagery acquisition, making this a successful and cost-effective venture.

Please join us for an informative session on how you can obtain and use these high-quality images. We will demonstrate how to download images from an interactive web-based map and how to perform basic analysis. We will also be discussing a future collaboration.

## Presentations

**Brian Fulfrost**

*University of California, Santa Cruz (UCSC)*

**How to Use the ArcIMS Website to Download Aerial Imagery**

**David Johnston**

*Association of Monterey Bay Area Governments (AMBAG)*

**Displaying Aerial Data and Performing Basic Analysis**

**Eric Sandoval**

*Monterey Peninsula Water Management District (MPWMD)*

**Available Products for Future Aerial Photography Collaborations**

**Mary Tsui**

*Land Systems Group*

**The Central Coast Joint Data Committee's Role in the Region**

The CCJDC is sponsored by the Association of  
Monterey Bay Area Governments (AMBAG)
